User Acceptance Testing (UAT) Report

PRODUCT: GO CANDID8

#	Feature / Module	Status	Test Comments & Observations
1	**Login Portal**	PASS	Smooth login and account creation experience.
2	**Pricing Plans**	PASS	Demo plan and Pro plan are functioning well. Note: Enterprise plan is currently not available.
3	**Settings** (Resume, Project, Company Portal)	PASS	All three configuration options are functioning perfectly.
4	**Resume Tailoring**	PASS	Significant improvement in both template layout and content compared to the legacy resume version. Also successfully generated a high-quality tailored cover letter.
5	**Job Hunt Flow**	PASS	Successfully added resumes and customized targeted country settings. Note: The focus company selection only contains 20 pre-linked companies; additional targets must be manually configured via Settings -> Portals.
6	**Search Configuration**	PASS	Keywords, Filters, URL pasting, and "Ask AI" capabilities are functioning properly.
7	**Today's Usage**	FAIL	No visible baseline or status changes observed in the jobs scraped and resume tailored tracking metrics.
8	**Live Output**	UNCLEAR	The function, visual purpose, and practical utility of this specific view/option could not be understood during testing.
9	**Pipeline Dashboard**	FAIL	Critical sorting/filter metrics like deadline, A grade, and seniority are currently inaccessible. Users can, however, successfully access "Newest" (with editable date filter) and "Work Type" (Any Work Type).
10	**Pipeline Stages & Export** (Export CSV, Filtered, Saved, Applied, etc.)	UNCLEAR	The operational workflows for Export CSV, Filtered, Saved, Applied, Interviewing, Offer, and Rejected tracking milestones are unclear and require clarification.
11	**AI Career Coach**	FAIL	Unable to construct a career roadmap. The system fails to pull or attach the user's resume into the active AI Career Coach creation flow.

#	Feature / Module	Status	Test Comments & Observations
12	**Skill Demand**	PASS	Functions perfectly. Options and analytical views change accurately based on configurations.
13	**Career Event**	PASS	Dynamic, country-specific localization functions correctly, placing networking and career events perfectly on their exact calendar dates.
14	**Story Bank**	PARTIAL	This component only initializes or works when underlying job postings are successfully transitioned into the 'Interviewing' lifecycle state.
15	**Auto-Apply Profile**	PASS	Profile customization works properly, aligning dynamic personal data parameters with targeted job description data.
16	**Interview Practice**	PASS	Functions excellently. The AI agent tailors practice questions dynamically matching the selected job vertical/type.
17	**Connect Gmail**	FAIL	Integration fails completely because Google has not yet verified the OAuth application credential workflow.
18	**Contact / Feedback**	PARTIAL	The system successfully fires suggestions and bug reports outwards to dhanushgoku997@gmail.com, but confirmation and actual receipt require pending server-side validation.
